U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)
VIT-PT034RE

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed

In patent number 5,870,912, granted February 16, 1999, and for which areissue patent is sought on the invention entitled Anti-Theft Brake Locking Device

the specification of which

☐ is attached hereto.☒ was filed on February 15, 2001 as reissue application number 09 / 783,774
and was amended on 02/15/01 and 11/15/01
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The limitation "U-shaped housing" is overly narrow. Furthermore, Applicant seeks to broaden the claim protection to only require: a base member for a placement on the floorboard of the vehicle; a first arm connected to said base member; a second arm spaded from and extending generally parallel to said first arm to form an elongate slot between said first and second arms, said slot being sized to receive a shaft of the control pedal and permitting a full extension of the control pedal shaft through said slot; and a locking mechanism operably associated with at least one of the said first and second arms for locking at least a portion of the control pedal shaft within said slot to thereby prevent depression of the control pedal.
